

Once again, you have a choice!

Liberty 2.0 Mainframe Alternative

Imagine a world *without* mainframe software costs where you can keep all of your current business logic and processes just as they are today...

Have the costs to maintain your mainframe environment grown disproportionate to the value it provides? Are application enhancement and maintenance projects taking too long? Concerned that specialized system programming skills are becoming rare and expensive? Is it becoming more difficult to align business needs with your IT capability?

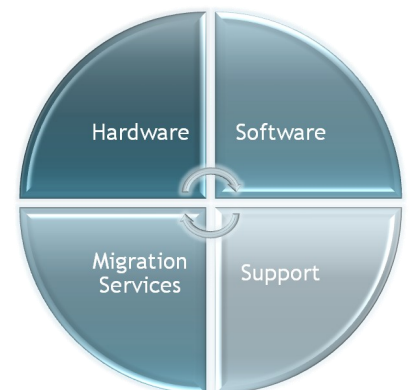

The mainframe world has changed dramatically in the past 15 years. Total Costs of Ownership far exceeds the resulting value for your organization. In today's fast paced environment, the mainframe simply cannot respond as quickly to your company's changing IT needs as other platforms. Since 1994, T3 has been providing cost effective mainframe alternatives and continues to innovate creative solutions and strategies.

Introducing the Liberty 2.0 Mainframe Alternative

Liberty 2.0 builds on T3's experience in providing affordable, high performing mainframe alternatives, bundling the industry's best hardware, software, services, and financing options. Liberty 2.0 is the only solution that fully integrates everything you need to leave the mainframe infrastructure behind and begin to realize all the advantages of a more modern environment.

Base System

T3 has partnered with Hewlett-Packard and Microsoft to bring you the most reliable, available, serviceable, secure and high performing platform available. With Windows Server and SQL Server, you have an enterprise-class infrastructure with a TCO far less than your existing mainframe environment. And one that will typically out-perform your old mainframe.

Liberty 2.0 Mainframe Alternative

The Benefits

- ◆ Eliminate expensive mainframe software costs
- ◆ Reduce high mainframe hardware costs
- ◆ Smaller footprint and energy requirements
- ◆ Leverages existing staff and expertise
- ◆ Improves development experience
- ◆ Positions for modernization activities
- ◆ Single point of contact support

Software

Replatforming solutions for CICS, DB2, COBOL, JCL, IMS, IDMS, ADABAS (and others) from T3, Micro Focus and HTWC will preserve your business logic and will avoid risky rewrite projects. Because operational equivalence is a key goal of the Liberty 2.0 solution virtually all of your processes can be reused, ensuring operational excellence and comparable service levels. Using similar technologies as the mainframe allows your existing staff to remain productive without extensive retraining and uniquely positions developers to take advantage of a more modern platform.

Migration Services

Migrating your applications and processes to Liberty 2.0 is much easier than you think. T3's engineering team has extensive migration experience, employs industry standard methodologies and will work closely with your staff to ensure a straightforward migration experience. You provide the application and operations knowledge, we do the rest!

Support

T3 has a long history and nearly 1,000 references for our unparalleled hardware and software support. The T3 support team acts as your single point of contact for any hardware, operating system software, database software and infrastructure problems. The strength of our partnerships with key hardware and software providers assures you will receive the support you deserve. And, it's available 24 x 7.

Take the Next Step...
